

YOUR ADVANCED GLOW RESET SERUM QUICK SUCCESS GUIDE

The simple routine behind real results

HOW TO APPLY

For best results, use it twice a day during the morning and evening, applying evenly across the face after cleansing.

- Apply 2 to 4 drops onto your face
- Massage gently until fully absorbed
- Wait one minute to set before makeup or other products
- Continue with the rest of your normal routine

Note: We recommend that you use products in order of viscosity (thinnest to thickest consistency).

IF YOU USE RETINOL PRODUCTS:

- Pause retinol while using the serum
- OR wait at least 2 hours between the two
- Never layer them directly

Mixing causes redness and irritation. Keeping them separate helps both work better.

WHAT TO EXPECT

Week 1–2: Your skin is adjusting. Nothing visible yet, but it’s working.

Week 5–8: Visible glow returning. Skin tone more even, texture improving.

Week 3–4: Skin starts feeling more hydrated and smoother. You’ll notice.

Week 9–12: Full results. Brighter, clearer, more radiant-looking skin.

THE CELLEXIA ROUTINE

MORNING AM

- 1 CLEANSER**
- 2 TONER**
- 3 SERUM** EYE LIFTING SERUM
- 4 SPOT TREATMENT** DARK SPOT CORRECTOR
- 5 TARGETED CREAMS** NECK & JAWLINE

- 2 SECOND CLEANSE** WATER-BASED
- 3 TONER** 1 - 3X WEEKLY
- 4 SERUM** EYE LIFTING SERUM
- 5 SPOT TREATMENT** DARK SPOT CORRECTOR
- 6 TARGETED CREAMS** NECK & JAWLINE
- 7 MOISTURISER** CELLULAR RENEWAL CREAM

CONSISTENCY MATTERS

Skipping days slows your skin’s progress. Each application builds on the last.

Tip: Keep it next to your toothbrush or other skincare products. Integrating it into your morning and evening routine will help you stay consistent.

WHAT'S INSIDE

SK-INFLUX® V MB

helps reinforce the skin's natural barrier and reduce moisture loss, improving skin protection and hydration. By supporting the barrier, it helps the skin retain moisture more effectively for a smoother, better-protected complexion.

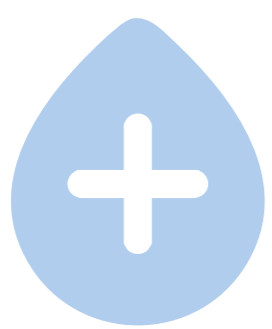

NIACINAMIDE NDS™

helps promote a more even-looking complexion and works alongside ceramides to strengthen the skin barrier, improving skin protection and reducing moisture loss over time.

VC-IP (VITAMIN C)

is a lipophilic Vitamin C derivative, meaning it absorbs into the skin more readily than standard water-soluble forms. It helps protect the skin from oxidative stress caused by UV exposure and pollution.

HYACARE® FILLER CL

is a crosslinked form of hyaluronic acid that contributes to increasing skin hydration and maintaining the skin's water balance, helping the complexion feel more supple and well-moisturized.
